

Product Materials Compliance Statement (MCS)

Product Materials Compliance Statement

At Mobileye, we are committed to upholding the highest standards of material and environmental compliance across our product portfolio. Our approach reflects a strong dedication to sustainability, regulatory integrity, and responsible sourcing throughout the supply chain.

Our products comply with the applicable global regulations:

1. Restriction of Hazardous Substances (RoHS: 2002/95/EC, 2011/65/EU, and 2015/863/EU)
2. Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)

We collaborate closely with our manufacturers and suppliers to obtain Full Material Disclosure (FMD) in accordance with IPC-1752A. By using external reputable database systems, we ensure that the materials used in our components and assemblies comply with applicable regulations, do not contain any restricted substances, and remain within the allowable thresholds defined by stringent compliance standards.

We implement environmentally responsible practices and continuously seek to minimize the environmental impact of our operations and supply.

Sustainability is integrated across the entire product lifecycle—from initial design and material selection to manufacturing and end-of-life management.

Our commitment includes:

1. Minimizing the negative sustainability impacts of raw materials.
2. Collaborating with external stakeholders on best practices for sustainable raw materials.
3. Increasing the use of third-party verified raw materials.
